

KOINLOCKER

GET UNBANKED

Simple, Smart, Secure

The definition of what constitutes ‘money’ is changing. Crypto is the new currency, and we’re on the brink of a new revolution that will forever change the way we transact. And all the things we needed banks for, we won’t need them anymore. As the traditional banking system gets increasingly inefficient and unreliable in this rapidly-changing world, it’s time to **Get Unbanked, with Koinlocker – the smart, secure cryptocurrency hardware wallet.**

Stay ahead with Koinlocker

Cryptocurrency has created a new medium of exchange of value between people without involving a central clearing authority, putting the power of banks in the hands of its users. But this also means that the burden of safety now lies with the user. This is where Koinlocker comes in.

While the security built into blockchain technology is top-notch, it can also be a little complex. To eliminate this complexity, Koinlocker products are designed to be simple enough to be used by anyone, without compromising on security, while providing complete protection from hackers.
